

MAXIMUM PARTICIPANTS PER COUNTRY/CONTINENT

To ensure fair distribution of bib numbers and allow athletes from all territories to participate, the organization has introduced a maximum registration limit for each country.

Once the limit for a given country has been reached, registration for that territory will be automatically closed, even if the official registration deadline has not yet been reached.

If the places allocated to a country are filled earlier than expected, new paying registrants will be placed on a waiting list.

The waiting list will remain active until May 20, 2026, when any places not used by countries that have not reached their limit will be reallocated in chronological order of registration.

If, at the end of the reallocation process, there are no places available, the registration fee will be refunded in full, including the payment fees applied by Endu.
